Software Installation

The VF134X1 is a standard UVC Camera, and you can use third-party software as long as it can recognize the source coming from the UVC camera. However, for the full functionality of this visualizer, we recommend using its exclusive ViiBoard software, which you can download for free from our website using the link provided below.

https://www.viisan.com/en/download/type4.htm

ViiBoard Software

NOTE: After the Ucam software is installed completely, please enter the 16-digit activation code to activate the software.
